

### Version Coding

Version coding must be undertaken when a new front driver-side door control module (N69/1) and/or front passenger-side door control module (N69/2) are connected to battery current for the first time.

#### Coding

-  
- Rest of the world

#### Coding Accessories

- Electrical Seat Adjustment (ESA) YES/NO

The front driver-side door control module (N69/1) and/or front passenger-side door control module (N69/2) may be version coded as many times as necessary.
