

#### Vacuum Line Routing

Engine 606.962, Model 210

Figure 1

- 10 In-line fuel injection pump
- 63 Check valve with orifice 0.8 mm
- 101 EGR valve
- 103/2 Mixing housing
- 104 Vacuum pump
- 107/3 Corrugated pipe
- 110 Turbocharger
- 110/2 Inter-cooler
- 112/1 Ventillation filter for EGR valve vacuum transducer (Y31/1)
- 114/2 Connector 6mm/6mm
- B28 Pressure sensor
- Y31/1 EGR valve vacuum transducer
- Y31/5 Boost pressure control/pressure control flap vacuum transducer
- ATM Vent to component compartment
- OUT Outlet from vacuum transducer
- VAC Vacuum supply from vacuum pump

- gr grey
- sw black
- GU rubber hose
