## Diagnosis - Diagnostic Trouble Code (DTC) Readout

### Preparation for DTC Readout

- Connect impulse counter scan tool and/or HHT to data link connector (X11/4) according to connection diagram (see section 0).  
**Model 124:** yellow wire to socket **14**  
**Models 129, 140, 202:** yellow wire to socket **7**  
**Model 210:** HHT

### Note concerning Electronic Traction System (ETS) adaptation (only model 202, as of 06/94)

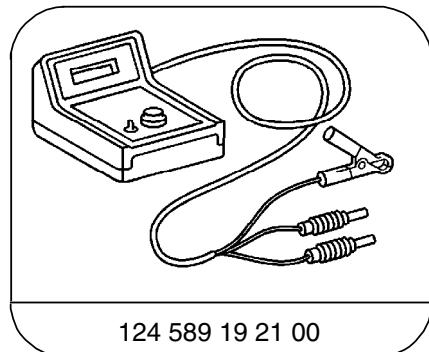

If the CC/ISC control module (N4/3) is replaced, or if a control module from another vehicle is temporarily installed, the ETS adaptation must be activated. Thereby allowing the CC/ISC control module to adapt to the vehicle configuration, ie: with ETS or ABS only.

### ETS Adaptation

1. Ignition: **ON**
2. Wait 3 seconds
3. Engine: **Start**
4. Wait seven seconds
5. Ignition: **OFF**  Absolutely required.
6. Ignition: **ON**
